

Giving you more green for your turf

PRONTECH™ is a fungicide, bactericide, virucide and algacide with a unique mode of action. PronTech™ will treat, control and prevent foliar and root diseases in turfgrass.

PronTech™ contains a 40% active ingredient in granular form that obtains a higher yield to use solution. The remaining 60% improves solubility enabling the product to work in hard water and reduce surface tension by up to 54%. PronTech™ works in a pH range of 3 to 11 and in extreme temperatures. PronTech™ has a strong residual effect, even in the presence of high loads of organic matter. PronTech™ does not create resistance and it works in contact and systemic action for high translaminar movement.

Golf courses can greatly benefit from using PronTech™ to help prevent a broad spectrum of pathogens. It eliminates *Pythium sp*, *Fusarium sp*, *Dollar Spot (Sclerotinia Homoeocarpa)*, *Xanthomonas sp*, *Brown Patch (Rhizoctonia sp)*, and many others.

Integrate PronTech™ in your pest management and HACCP sanitation programs and it will greatly benefit your operations. PronTech will penetrate biofilm and destroy contaminated sources that can spread microorganisms through your water lines. It also effectively disinfects equipment, benches and tools.

Use PronTech™ once in a trial and it will change your concept of how effectively to eliminate pathogens and treat your turf

**Turf
PronTech™**
Treat • Control • Prevent

Bactericide • Fungicide • Virucide • Algacide

The benefits can't be beat

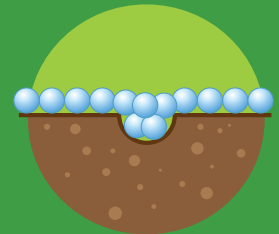

- Safe for your workers and the environment when used as directed
- Systemic and contact control
- Curative and preventative action
- Easy-handling granular formulation
- Consistent performance
- 40% active ingredient in granular form obtaining a higher yield
- At 200 ppm of active ingredient, PronTech™ is able to eliminate 99.999% of microorganisms on contact in 30 seconds in hard water up to 550ppm of CaCO₃
- Water soluble – granules readily soluble in hot or cold water
- Neutral pH – works in a pH range of 3 to 11
- Stable – solutions are stable
- Lasting benefit – coverage for prolonged time after application

Effectively reaches pathogens in soil and in plants

PronTech™ penetrates rapidly and efficiently in minute crevices and pockets. The action of PronTech™ reduces the surface tension of the water by as much as 54% and allows more coverage with less solution. Water with PronTech™ has a moistening effect. Soil-borne pathogens that are deep down will be reached and eliminated better.

Water WITH PronTech™

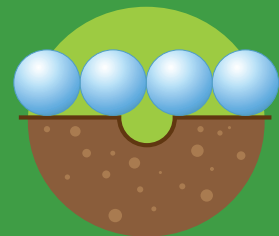

Eliminates a broad-spectrum of pathogens

PronTech™ is a broad-spectrum fungicide and bactericide that has been tested with excellent results for the following pathogens:

- *Xanthomonas campestris*
- *Sclerotinia homeocarpa*
- *Helminthosporium spp*
- *Anthraxnose sp*
- *Fusarium roseum*
- *Pseudomonas sp*
- *Phyvarium sp*
- *Heterosporium echinulatum*
- *Pythium sp*
- *Rhizoctonia sp*
- *Powdery Mildew*
- *Cladosporium*

Water WITHOUT PronTech™

PronTech™ is Quality. Our business has grown because our product outperforms the alternative. We are committed to your satisfaction. Our policy is to offer the best quality product with the best service at the best price. Call or email us today.
